Driven Computer Science major at a highly competitive university, with extensive leadership, graphic design, and STEM expertise seeking to provide world-class programming, IT capabilities, and design services.

Skills

- Java, JavaScript, HTML, CSS, Bash, and Visual Basic.
- MSSQL and MySQL.
- Git and GitHub.
- Adobe Photoshop, Illustrator, Premiere, and After Effects.
- Microsoft Word, Excel, and PowerPoint
- WordPress
- Language Proficiency Levels:
 - Spanish: Native Speaker
 - English: Fluent
 - French: Professional

Experience

AUGUST 2018 - PRESENT

Creative Operations Lead / Software Engineering Daily

Software Engineering Podcast, community, and media hub with worldwide listeners.

- Handles day-to-day publication operations for the Software Engineering Daily Podcast, including managing the WordPress page, and publicizing episodes and posts on social media.
- Builds and collaborates on workflows to make routine work more streamlined and efficient, from start to finish.

JUNE 2018 – AUGUST 2018

Software Development Intern / Corporativo Zell, Guadalajara, Jalisco, Mexico

Fintech and Financial Service Provider headquartered in Guadalajara, Mexico.

- Assisted in the planning, development, and implementation of various fintech services and products.
- Developed an advanced, cross-platform cybersecurity app that enables Zell customers to use two-factor authentication to log into sensitive web portals, employing server-side ASP.NET and client-side JavaScript, HTML, and CSS.

JUNE 2015

Electronics Assembly Intern / Resser GPS, Guadalajara, Jalisco, Mexico

Security Systems Manufacturer headquartered in Guadalajara, Mexico.

- Assisted in the assembly and manufacturing process of newly-developed electronic GPS Security Systems.
- Assembled, soldered, and performed quality control of dozens of custom-printed PCB boards.

Education

MAY 2018 - PRESENT

BS in Computer Science / Florida State University, Tallahassee FL

- Computer Science student seeking a Bachelor of Science degree at a nationally-acclaimed university in Computer Science/STEM.

AUGUST 2014 – MAY 2018

High School / Blessed Trinity Catholic High School, Roswell GA

National Blue Ribbon Award High School.

- Honors student. Achieved a 90.66 cumulative GPA and a 3.56 GPA from 9-11th grades.
- Took rigorous courses, including 10 college-level courses such as AP Physics, AP Computer Science, AP English Language, and AP Comparative Government and Politics.

Projects

APRIL 2018 - PRESENT

Rikka-Bot / Discord Python Bot

Chatbot and moderation bot currently employed by over 70,000 Discord users worldwide.

- Designed, programmed, and currently hosts the project, leading a team of 4 members on the development team.
- Integrated the Discord API, Gizoogole.net API, Google Translate API, and CleverBot.io API to process and create intelligent responses based on user need, including language translation, moderation, and miscellaneous fun commands.

JUNE 2018 - PRESENT

PDF Parser/ VB .NET PDF Document Joiner

Visual Basic .NET program that joins images and PDFs into a single PDF document, optionally with SQL Databases.

- Designed, built and programmed the program from concept to implementation, a version of which is being used today in the fintech industry.
- Implemented the PDFSharp .NET library into a Visual Basic application that queries SQL databases to process and convert documents into a PDF document of various shapes and sizes.

MARCH 2018 – APRIL 2018

Hyperion FRC Robot / Robot code for Hyperion, 2018

Robot code that includes actuating various solenoids, motors, and encoders, to carry out actions both autonomously and via human controls.

- Designed and implemented the working version of the robot code.
- Led a team of 5 developers on the programming team, including pseudocoders and debuggers.
- Developed an advanced autonomous system that reads data from the playing field, assesses its current position, and picks up and places a milk crate into a platform that is randomly chosen at the beginning of the match.

MAY 2015 – MARCH 2018

AutoAircrack / Bash Penetration Testing Program

Bash program that automates and speeds up the use of the popular penetration-testing program suite, aircrack-ng, to test and challenge the security of wireless networks, in a home and enterprise setting.

- Integrated the environments of airodump-ng, aireplay-ng, and aircrack-ng, in a customized and graphical user-friendly interface.
- Designed, coded, and deployed the program to test the security of several home and enterprise networks.

Activities

- Active Mentor and Volunteer for 3 high school robotics teams, including FRC team #4516, Hyperion, and two other FTC teams, all members of an internationally-recognized organization promoting STEM education for students around the world. Mentors a team of over 60 High School students, teaching them important skills in leadership, teamwork, professionalism, and programming development abilities.
