Skills

- Java, C++, Python, JavaScript/TypeScript, HTML, CSS, Bash, and Visual Basic
- Mobile App Development (Apache Cordova, Ionic)
- Website Management (WordPress, Jekyll)
- Database Management (MSSQL and MySQL)
- Version Control Systems (Git and GitHub)
- Social Media Management (Buffer, Google Analytics, TweetDeck)
- Adobe Photoshop, Illustrator, Premiere, and After Effects
- Microsoft Word, Excel, and PowerPoint
- Language Proficiency Levels:
 - Spanish: Native Speaker
 - English: Fluent
 - French: Professional

Experience

MAY 2019 – AUGUST 2019

Engineering/Web Intern / CPS Products, Inc.

HVAC/R Smart Tools Company headquartered in Miramar, FL.

- Developed an advanced, cross-platform IoT consumer app that enables BLE connectivity with smart devices, employing Apache Cordova, Ionic, and TypeScript technologies to create native experiences on Android and iOS.
- Developed CDN and cache protocols and more efficiency measures on the CPS USA, Europe, and Australia WordPress sites to increase the PageSpeed Insight score by more than 50% on each site.
- Conducted competitive analysis on in-house and competing products in order to provide valuable research to R&D teams on the state of the HVAC/R market in order to create new and innovative products.

AUGUST 2018 – FEBRUARY 2019

Creative Operations Lead / Software Engineering Daily

Software Engineering Podcast, community, and media hub with over 60,000 worldwide listeners.

- Handled everyday operations for Software Engineering Daily and Fintech Daily podcasts, including social media management, WordPress management, graphic design, quality control, community engagement, and problem-solving.
- Built and collaborated on workflows to make routine work more streamlined and efficient, from start to finish.

JUNE 2018 – AUGUST 2018

Software Development Intern / Corporativo Zell, Guadalajara, Jalisco, Mexico

Fintech and Financial Service Provider headquartered in Guadalajara, Mexico.

- Assisted in the planning, development, and implementation of various fintech services and products.
- Developed an advanced, cross-platform cybersecurity app that enables Zell customers to use two-factor authentication to log into sensitive web portals, employing server-side ASP.NET and client-side JavaScript, HTML, and CSS, while interfacing with existing SQL database servers.

Education

MAY 2018 – MAY 2021 (EXPECTED)

BS in Computer Science/ Florida State University, Tallahassee FL

- Computer Science student seeking a Bachelor of Science degree with concentrations in Mathematics and Physics at a nationally-acclaimed university in Computer Science / STEM.
- Active member of the ACM @ FSU, Cybersecurity Club, and HackFSU.

Projects

APRIL 2018 - PRESENT

Rikka-Bot / Discord Python Bot

Chatbot and moderation bot currently employed by over 135,000 Discord users worldwide.

- Designed, programmed, and hosts the project, and leads a team of 4 members on the development team.
- Integrated the Discord API, WolframAlpha API, Gizoogole.net API, Google Translate API, and CleverBot.io API to process and create intelligent responses based on user need, including language translation, moderation, and miscellaneous fun commands.

JANUARY 2019 - PRESENT

Dirac_AI / Python AI Chatbot

Advanced Artificial Intelligence chatbot with a web and backend interface.

- Designed, implemented, and hosts the project, and leads a team of 4 members on the development team.
- Created a recursive neural network self-learning system that improves based on user input.
- Designed an adaptable, modular bot able to be implemented into many different applications across the stack.

MARCH 2018 – APRIL 2018

Hyperion FRC Robot / Robot code for Hyperion, 2018

Robot code that includes actuating various solenoids, motors, and encoders, to carry out actions both autonomously and via human controls.

- Designed and implemented the working version of the robot code.
- Led a team of 5 developers on the programming team, including pseudocoders and debuggers.
- Developed an advanced autonomous system that reads data from the playing field, assesses its current position, and picks up and places a milk crate into a platform that is randomly chosen at the beginning of the match.

MAY 2015 – MARCH 2018

AutoAircrack / Bash Penetration Testing Program

Bash program that automates and speeds up the use of the popular penetration-testing program suite, aircrack-ng, to test and challenge the security of wireless networks, in a home and enterprise setting.

- Integrated the environments of airodump-ng, aireplay-ng, and aircrack-ng, in a customized and graphical user-friendly interface.
- Designed, coded, and deployed the program to test the security of several home and enterprise networks.

Activities

MAY 2018 – PRESENT

Robotics Mentor / FIRST Robotics Mentor

- Active Mentor and Volunteer for 3 high school robotics teams, including FRC team #4516, Hyperion, and two other FTC teams, all members of an internationally-recognized organization promoting STEM education for students around the world.
- Mentors a team of over 60 High School students, teaching them important skills in leadership, teamwork, professionalism, and programming development abilities.
